

Dejan M. Rašić

PERSONAL

Date of Birth: 1969
Place of Birth: Belgrade, Serbia, Yugoslavia
Nationality: Serbian
Citizenship: Republic of Serbia
E-mail: drnajed@gmail.com
Languages Native language Serbian
Written and oral English

EDUCATION

1988–1995 University of Belgrade Faculty of Medicine
Diploma paper: »Chlamidial infections of the eye«
Graduated with average grade point 8.10/10.0 - Doctor of medicine (MD)

1995–1996 Obligatory rotations (12 months)

1996 Professional exam for Doctors of Medicine in front of the Examination Board of the Ministry of Health Republic of Serbia

1995–2002 Postgraduate Studies in Citology, Histochemistry, Electron Microscopy and Embryology, University of Belgrade Faculty of Medicine
Postgraduate Master thesis: »Early postnatal development of the rat eye – from birth till eyes opening«
(mentor: Prof. dr Zoran Latković, MD, PhD, MSc)
Graduated Summa Cum Laude

1997–2003 Residency in Ophthalmology, Clinic for Eye Diseases/University Eye Hospital, Clinical Centre of Serbia, Belgrade (the largest/leading tertiary eye care center in Serbia)
Graduated Egregia Cum Laude (5.0/5.0) – Board certified Ophthalmologist (MScOphth)

2003-2009 Residency in Anatomic Pathology, Institute of Pathology, University of Belgrade Faculty of Medicine
Graduated Magna Cum Laude (4.0/5.0) - Board certified Pathologist (MScPath)

2005 SOE Educational Grant for Ophthalmologists-in-training from Eastern Europe – Fellowship in Ophthalmic Oncology and Pathology at the Helsinki University Eye Hospital, Prof. dr Tero Kivelä

2006 3rd LECOP Paediatric Ophthalmology Course, Prague

2007 Workshop on Retinopathy of Prematurity, Novi Sad
International Cataract Course, Prague, Czech Republic (organized by ČSRKCH)

2012 Seminars in Ophthalmology - American-Austrian foundation, Salzburg, Austria

2013 Doctorate (PhD) thesis: *»Expression of minichromosome maintenance proteins 2, 5 and 7 in periocular basal cell carcinoma«* (mentor: Prof. dr Dimitrije Brašanac, MD, PhD, MSc) – in progress

CERTIFICATION AND LICENSURE

2003	Serbian Board of Ophthalmology
2009	Serbian Board of Pathology
2009	Medical licence (Serbia) – N° 109449 (valid through 12/2015)

MEMBERSHIPS IN PROFESSIONAL SOCIETIES

1995-present	Serbian Medical Society
2003-present	Serbian Association of Ophthalmologists
2008-present	European Ophthalmic Pathology Society (EOPS) (elected unanimously !)
2009-present	Serbian Association of Pathologists
2010-present	Serbian Association of Cataract and Refractive Surgeons

EMPLOYMENT (full-time)

2003-present	Department for intraocular, adnexal and orbital tumours Clinic for Eye Diseases/University Eye Hospital, Clinical Centre of Serbia Pasterova 2, 11000 Belgrade, Serbia (the largest/leading tertiary eye care center in Serbia)
2003-present	Ophthalmic Pathology Laboratory (<i>founded in 1951 by prof. Olga Litrićin; the only such laboratory in Serbia</i>), Clinic for Eye Diseases/University Eye Hospital, Clinical Centre of Serbia, Belgrade
2008-present	Assistant professor in Ophthalmology at the University of Belgrade Faculty of Medicine
2009-present	Chief of Ophthalmic Pathology Laboratory Clinic for Eye Diseases/University Eye Hospital, Clinical Centre of Serbia, Belgrade
2011-present	ROP screening and laser/antiVEGF therapy - University Clinic of Gynecology and Obstetrics "Narodni front", Belgrade (<i>part-time employment</i>)

WORK EXPERIENCE

Eighteen years of relevant experience (twelve as specialist) in diagnosis, prevention and treatment (surgical and non-surgical) of illnesses for patients within the Ophthalmology specialty, particularly in:

- Ophthalmic oncology/surgery (including paediatric) – adnexal, intraocular, orbital
- Ophthalmic plastic and reconstructive surgery
- Cataract surgery (including paediatric congenital and traumatic cataracts)
- Trauma (ocular/anterior segment and adnexal) and anterior segment reconstructive surgery
- Retinopathy of prematurity screening and therapy
- Ophthalmic pathology

PROFESSIONAL SKILLS

DIAGNOSTIC OPHTHALMOLOGY AND CONSERVATIVE (non-surgical) THERAPY in all fields of ophthalmology

SURGERY

1. Various methods and procedures in Ophthalmic oncology surgery (adults and children) (including diagnostics)
 - a. eyelids tumours of various size (over 600 procedures)
 - b. eyelids tumours with intraorbital extension avoiding exenteration (over 50 procedures)
 - c. conjunctival tumours (over 20 procedures, including 7 penetrating scleroplasties for invasive SCC) with or without mytomycin C
 - d. orbital tumours (over 60 procedures)

- e. intraocular tumors – 11 iridectomies, 15 iridocyclectomies (combined with PHACO+IOL), 1 chorioidectomy (27 procedures)
 - f. iris cysts (with or without simultaneous PHACO+IOL) – 5 procedures
 - g. eyelids and orbit non-neoplastic pathology (e.g. dermoid cyst, epidermal cyst, hydrocystoma, chalazion, dacryops, etc.) – (over 1500 procedures)
 - h. congenital haemangioma conservative treatment with propranolol – 10 cases so far
2. Various methods and procedures in Ophthalmic plastic and reconstructive surgery (including diagnostics)
- a. enucleation with PMMA implant (over 270 procedures) – neoplastic (including children) and non-neoplastic
 - b. evisceration with PMMA implant (over 160 procedures)
 - c. exenteration (over 50 procedures)
 - d. anophthalmic orbit/socket reconstruction (over 30 procedures) – dermo adipose grafts, oral mucosa transplants, etc.
 - e. eyelid ptosis (senile, neurogenic, traumatic, congenital) – levator plication, mullerectomy, eyebrow suspension (over 200 procedures)
 - f. entropium (senile) (over 100 procedures)
 - g. ectropium (senile, cicatricial, paralytic) (over 100 procedures)
 - h. dermatochalasis (over 250 procedures)
 - i. pterygium with auto conjunctival transplants (with or without mitomycin C) (over 160 procedures)
 - j. other (baggy eyelids, eyebrow ptosis, floppy eyelid, epicanthus, symblepharon, lagophthalmos, anophthalmic/microphthalmic orbital surgery/reconstruction, ocular surface reconstruction after chemical injuries, trichiasis, distichiasis, corneal decalcification with EDTA, canaliculotomy in canaliculitis, etc.) – over 250 procedures
3. Cataract surgery (presenile, senile, mature/brunescant, hypermature, PEX, subluxated, congenital, traumatic adults/children; aphakic eye surgery)
- a. over 3000 PHACO procedures (MICS) on Millenium, Stellaris, Infinity with various types of IOL's
 - b. over 260 ECCE procedures
 - c. secondary IOL implantations (PMMA ACIOL's, verisyse posterior chamber implantation, iris fixation, scleral fixation) – over 70 procedures
4. Trauma surgery (adults and children) and anterior segment reconstructive surgery
- a. penetrating intraocular wounds (corneal, scleral, corneo-scleral with or without uveal prolapse) (over 400 procedures)
 - b. anterior segment foreign body (intracorneal, anterior chamber/iris, lens) (over 30 procedures)
 - c. eyelids trauma (over 350 procedures)
 - d. lacrimal canalicula repair with silicone tube (over 70 procedures)
 - e. foreign body removal from the lens, anterior chamber, vitreous – over 40 procedures
 - f. anterior segment reconstructive surgery (iridodialysis repair, IOL scleral fixation, traumatic mydriasis repair, bag dialysis repair, synechiolysis, autorotatory keratoplasty for corneal scars, etc.) (over 60 procedures)

RETINOPATHY OF PREMATURITY SCREENING AND THERAPY since 2011.

- 1. over 400 babies per year for screening
- 2. ~25 for laser and antiVEGF therapy per year

OPHTHALMIC PATHOLOGY (~2500 biopsies per year) since 2003.

Eleven years of relevant experience (five as specialist) in ophthalmic pathology.

- 1. uveal melanomas (enucleations specimens) (~40 biopsies per year)

2. retinoblastomas (enucleations specimens) (3-5 biopsies per year)
3. enucleations non-neoplastic specimens (~20 biopsies per year)
4. eviscerations specimens (~40 biopsies per year)
5. eyelids neoplasms and pseudotumours (~1200 biopsies per year)
6. orbital neoplasms (exenterations and excisional/incisional biopsies specimens) (~40 biopsies per year)
7. lymphomas (adnexal/intraocular) (~25 biopsies per year)
8. corneal buttons (~250 biopsies per year)
9. specimens routinely obtained from dacryocystorhinostomies (~120 biopsies per year)
10. conjunctival melanomas and OSSN's (~25 biopsies per year)
11. chalazion biopsies (~250 biopsies per year)
12. miscellaneous (pterygium, dermatochalasis, ptosis, trauma, conjunctival cysts, granulomas and nevi, cataract, etc.) (~450 biopsies per year)

FUTURE INTERESTS

Vitreoretinal surgery for trauma, penetrating and lamellar keratoplasty, glaucoma surgery
